

Spooky Tiny Glass Bottle

Supplies

Included: Tiny glass bottle, glitter, spooky sticker

Not included: scissors, glue

1. Peel the back of the sticker off.
2. Place the sticker where you'd like on your glass bottle. Make sure to look at the black silhouette. Press over the black areas to make sure the sticker is secure.
3. Gently peel off the clear layer that's over the sticker.

4. Remove the cork from the glass bottle.
5. Snip off a corner of the plastic baggie containing the glitter. Keep this hole very small.
6. Pour the glitter into the glass bottle from the hole you just cut. Make sure you have newspaper or something under the bottle to catch any excess glitter.
7. Fill the bottle as much or as little as you'd like.
8. Put the cork back in the bottle.
9. Glue the cork in to avoid a spill. Put a dab of strong glue on the sides of the cork and then put the cork in the bottle.

** If you'd like to make this into a necklace, tie some leather cord around the neck of the bottle. **
